RELEVANT EXPERIENCE

Denver University FullStack JavaScript Boot camp.

EDUCATION

Denver University Full Stack Coding Boot camp, Online—
Certificate

January 2022 - April 2022

I learned both the front end and back end using JavaScript, React, Html, CSS, Node.js, Express.js, SQL, and MongoDB.

PROJECTS

Mountain Madness— *This was the first project of the bootcamp. We had to build an app utilizing bootstrap and JavaScript*

My role in this project was to work on JavaScript.

https://bholt7.github.io/Bug-Spray/

All Pain No Grain— *This was the second project of the bootcamp. We had to build a full stack application using our own rest API*

My role in this project was to create the user interface and handle the front end JavaScript for the project.

https://gentle-everglades-97970.herokuapp.com/

Fetch — *This was the 3rd and final project of the bootcamp. We had to show that we could utilize React.Js on the Frontend and MongoDb on the Backend.*

My role here was to build the UI using React and Material UI.
